# THE rise of MINI RAMP'S here.

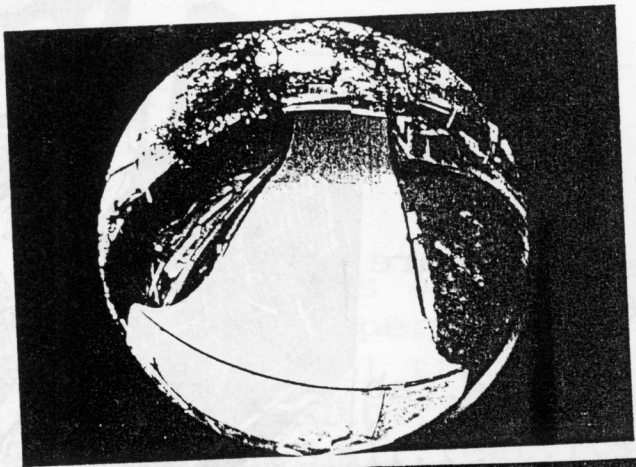

of mini ramps is a parent here cause look at ANDYS, it's in a ware  
 barn, nice, slippery masonite, steel coping, and about 6 feet  
 high, reall cool trannys with the  
 16 feet of width its new Theres also BRIANS, 10 feet across, ab  
 out 5 and uh half feat. its been around awhile. What? oh..there is a  
small mini ramp in a not a warehouse but outside cause some kid  
 named welli, built it out there its MUYR RAMP, 8feeta width. almost 3  
 feet high, and it used to have One foot of verticul. it (the vert)  
 is gone, though, leaving the transitions that are soo tighty, ...  
 welp..
